**THE VERTICAL STYLE** carport has an A-Frame design with vertically running ribs that direct rain and snow off the building more quickly. The roof panels are trimmed for a clean, finished look and include a 4" - 6" overhand on all four sides. With an enhanced appearance, increased strength, reduced maintenance needs and an extended service life, the Vertical style is the superior option for your carport.

### Lifts Are Required For:

- All buildings 15' or 16' tall
- All buildings 32' and wider
- All buildings 26' or wider **AND** 13' or taller

The customer is responsible for providing all lifts and must have it onsite upon the installer's arrival.

## Waiver Policy

- We strongly recommend all buildings over 36 feet long have the vertical style roof.
- Customer must sign waiver on regular or boxed eave style buildings longer than 36 feet due to potential leaking issues at seams.
- We are not responsible for leaks under base rails.

## Land/Concrete

- We recommend concrete be 1 foot shorter than building roof length.
- Concrete must be level and square, corner to corner.
- Return trip fees will be applied if building is not installed.
- See dealer for possible labor charges.

## Low Price Guarantee

We'll match any competitor's advertised price for same quality building.

## Certified Buildings

You may be interested in a certified building if you are in an area or municipality that requires you to have a high wind load, heavier snow load or engineered drawings.

Certified buildings offer premier design and the highest quality. We offer certified carports, garages & barns. Engineer stamped drawings are available for customers who purchase this premium structure. Our certified buildings can be built to stand up to 90 to 130 MPH winds and 20 to 30 PSF ground snow loads. Certification may vary depending on county or state regulations.
